Compare your electricity usage with similar households in your area.

How it works:

- Select the household size that represents the number of people in your home.
- Compare the 'Average daily consumption benchmark' to 'Your household daily consumption'.

To find out more about how average household energy usage is calculated and get some energy efficiency tips, visit www.energymadeeasy.gov.au

This benchmark applies to residential electricity consumption. It is calculated based on figures provided by the Australian Energy Regulator (AER) and is indicative only. Consumption benchmarks exclude some large appliances, such as pool pumps, and generation systems (e.g. PV). For more information or useful energy efficiency tips, visit: www.energymadeeasy.gov.au
